10 FAQ

1. **Q: Why does the prompt “Unavailable connection profile” appear?**

A: Please add a connection profile manually.

2. **Q: The connection speed and data transfer rates are too slow**

A: Please check the local network signal strength.

3. **Q: Sending an SMS failed**

A: Please make sure the SMS center number is correct.

4. **Q: I cannot receive an SMS**

A: Please check whether your (U)SIM card’s memory is full.

5. **Q: Does it support roaming?**

A: This depends on the local operator. Please check with your local operator or service provider.

6. **Q: I cannot install applications?**

A: The reasons are shown below:

1. If automatic installation unfinished, please check whether the antivirus and security software is working. If it is, close it and reinstall. To those which cannot be disabled, close the

monitor program and do not start it until installation finished.

2. On some PCs, installation of the driver may take a long time because of the PC configuration. So please wait and do not cancel or unplug the device during installation. If it failed, uninstall the driver first and then reinstall it.
